Dr. D. Y. Patil College of Applied Arts and Craft

Bachelor of Fine Arts in Applied Arts

(Major: Communication Design / Minor: User-Interface Design)

Pune, India

(Graduated: July, 2017)

GPA: 3.5

EXPERIENCE

Vanguard ID Systems (Marketing Associate)

Downingtown, PA (September 2025 – January 2026)

- Conducted competitive research, customer interviews, and market analysis to rebuild Vanguard's brand presence, delivering a structured content calendar, refreshed marketing assets, and outreach campaigns across social, seasonal, and partnership channels
- Migrated 20K+ legacy sales records into HubSpot and built revenue/pipeline dashboards from the ground up — turning two decades of unusable data into a single source of truth that now informs sales and leadership's go-to-market decisions.

TATA Digital – Financial Services (Senior Design Consultant – Product Marketing)

Bangalore, India (September 2023 - November 2024)

- Served as the cross-functional coordination point across product, growth, channel execution, and partner stakeholders — translating campaign requirements into multi-channel activation across stadium, broadcast, web, and app; managed intake, alignment, and delivery across Tata's partner brand ecosystem through IPL 2024, contributing to 2M+ active card holders and 12M+ monthly transactions
- Identified production bottlenecks as a strategic liability and engineered AI-integrated content workflows using LLMs and Midjourney, compressing campaign delivery from 2 months to 2 weeks and reducing costs to a fraction of traditional studio budgets — eliminating external team and equipment dependencies entirely.

Treebo Hotels (Senior Design Consultant – Brand & Performance Marketing)

Bangalore, India (April 2022 - Aug 2023)

- Senior member of the performance marketing team responsible for social media, SEO, brand identity, and overseeing quality and messaging for an external creative agency; reporting to the Director and VP of Growth Marketing with a focus on improving sales-driven campaign performance across digital channels including in-app and social media experiences
- Independently identified two strategic gaps: rebuilt Treebo's stalled YouTube channel around a video-first, micro-influencer strategy, driving a 28% YoY lift, a 9% rise in repeat bookings, 3.6M impressions, and 210,000+ direct engagements; and authored the Itsy brand book that repositioned a segment headed for discontinuation, helping grow the brand from ~10K to 27K followers.

Schbang Digital (Senior Design Consultant – Client & Campaign Marketing)

Bangalore, India (2021 - 2022)

- Reporting to the Head of Design, led a team of 3 junior designers delivering campaign creative for Domino's, Rupeek, and OnSiteGo simultaneously — running daily syncs with the marketing team on performance stats and pipeline updates, and pulling insights from analysts to inform what shipped next
- Coordinated in-house photography/videography production and sat in on client briefings directly, keeping three brands with distinct needs — an established giant needing constant fresh content, a young brand still defining its identity, a service brand needing visual translation — moving on schedule

PROJECTS

FlippAR - Travel Tech Startup (Designer)

Bangalore, India (2018–2019)

Led on-the-ground user testing for an AR teleportation experience, translating field insights directly into interaction and onboarding fixes; developed user personas and user stories, iterated acceptance criteria through testing cycles, and participated in sprint ceremonies for stakeholder-driven improvements; coordinated approvals and content sign-offs with government bodies including the Karnataka State Tourism Department and Bangalore Airport Authority to meet public-facing compliance requirements.

BillBolo - BNPL Fintech Startup (Design Consultant)

Bangalore, India (2020-2021)

Led market and design research into how Tier 3/4 India credit-newcomers relate to BNPL, then defined end-to-end workflow architecture, user journey states, and onboarding flows around those findings — including accessibility-driven concepts like an always-on WhatsApp support channel and read-aloud page navigation.
